manufacturing operations across the United States, in Canada, Mexico and China. For more information, please visit www.innophos.com 'IPHS-G'

Innophos (Booth #2561) will feature science-backed solutions that address key global food trends including: (1) eliminating titanium dioxide, (2) stabilizing protein beverages, (3) reducing sodium and (4) creating better bacon. Songwei Wu, Innophos Scientist, will showcase “Solutions to Replace Titanium Dioxide” on Wednesday, June 5th at 1:15 PM on the Central Booth Stage. Through her presentation, Ms. Wu will discuss how today’s food manufacturers are facing pressure to find an alternative to titanium dioxide and how Innophos ingredients can help solve this challenge in multiple applications.

“We are excited to return to IFT19 to showcase our industry-leading, science-backed solutions developed to help our partners and customers meet growing consumer demand for products that better support health, wellness and quality of life for all,” said Sherry Duff, Chief Marketing and Technology Officer. “Songwei’s presentation is timely, especially as more and more consumers are looking to incorporate products into their lives that combine less overall ingredients with healthier alternatives.”

Stop by booth #2561 to learn more about these solutions and how Innophos creates essential ingredients to improve quality of life.

Songwei Wu will also be available for press opportunities during the expo. To schedule an interview, please reach out to the media contact listed below.
